PROFILE

I am currently a networking specialist at a wireless internet services provider, with experience in managing an array of responsabilities, from graphic/web design to electronic instalations and equipment. My background is in brand strategy, visual design, account management and web technologies. Every project I participate to, has a mindful but competitive approach. I am fueled by my passion for understanding the nuances of new technologies. I consider myself a 'forever student,' eager to both build on my academic foundations in computer science and stay in tune with the latest digital trends and strategies through continued coursework. Meanwhile, I vastly improved the productivity of my team, by implementing strategic project management methods and ensuring smooth work-flow in our departament.
